

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow customers to search for and select the medicines they need.	High	When the customer selects a medicine, it is added to the order summary.	Helps customers find and choose the medicines they require.
FR-002	Functional	The system shall allow customers to upload or scan a doctor's prescription when it is required.	High	The uploaded or scanned prescription is successfully attached to the order.	Needed for medicines that require a prescription.
FR-003	Functional	The system shall allow customers to select the required medicines and place a medicine pickup order.	High	When the customer clicks "Place Order," the order is created and made available to the pharmacist for verification and preparation.	Allows customers to submit their medicine orders for pickup.
FR-004	Functional	The system shall allow the pharmacist to check medicine availability, prepare the order, and mark it as ready for pickup.	High	When the pharmacist marks an order as "Ready for Pickup," the system sends a notification to the customer.	Lets the pharmacist process orders and inform customers when they can collect them.
FR-005	Functional	The system shall allow pharmacy staff to manage medicine inventory, add new medicines, modify prices, and view daily sales reports.	High	When staff make an inventory or price change, the updated information is displayed correctly, and sales reports can be viewed.	Helps pharmacy staff manage medicines and monitor daily operations.

NFR-001	Nonfunctional	The system shall allow customers to place an order within 90 seconds .	High	At least 95% of orders are completed within 90 seconds.	Reduces customer waiting time, especially during busy hours.
NFR-002	Nonfunctional	The system shall provide a simple and responsive interface where each user action receives a response within 2 seconds .	High	When the user selects any button or option, the system responds within 2 seconds.	Makes the self-service system quick and easy to use.
